Title: Amendment of Part 63 of the Commissions Rules to Provide for Notification of Common Carriers of Service Disruptions - Section 63.100.

Form No.: N/A.

Type of Review: Revision of existing collection.

Respondents: Businesses or other for-profit.

Number of Respondents: 208.

Estimated Time Per Response: 5 hours.

Total Annual Burden: 1,040.

Needs and Uses: 47 CFR Section 63.100 requires that any local exchange or interexchange common carrier that operates transmission or switching facilities and provides access service or interstate or international telecommunications service that experiences an outage on any facilities which it owns or operates must notify the Commission if such service outage continues for 30 minutes or more. An initial and a final report is required for each outage. In an Order of Reconsideration in CC Docket No. 91-273, the Commission amended the rules to require, among other things, that local exchange or interexchange common carriers or competitive access providers that operate either transmission or switching facilities and provide access service or interstate or international telecommunications service report outages that effect 30,000 or more customers or that affect special facilities and report fire-related incidents impacting 1,000 or more lines. With such reports the FCC can monitor and take effective action to ensure network reliability.
